** The Consumer Price Index (CPI) is a measure of the average change over time in the prices paid by urban consumers for a market basket of consumer goods and services. There are many indices reported by the Bureau of Labor and Statistics. The CPI-U is a general index that tracks retail prices affecting urban consumers. The CPI-W is a more focused index that tracks retail prices affecting urban hourly wage earners and clerical workers. The percentage numbers presented reflect the 12-month percentage change. (for example: from January 2020 from January 2019) The US City Average is most generic and broad; whereas West B/C is regional to the West Coast. The Portland-Salem CPI index is no longer being reported by B.L.S. The Pacific Size index is a newer index with the base period of December 2017. Because it is a newer index, it has limited historical value. Any particular use of a CPI Index merits independent review and analysis for the demographics of your agency.*
